LEADERSHIP & WORK EXPERIENCE

Eli Lilly & Company, Indianapolis, IN

July 2023-Present

Software Engineer, Software Product Engineering

- Collaborating with cross-functional international teams on the development of LillyDirect™, an online direct-to-consumer pharmacy progressive web app (PWA).
- Developing software using clean code practices to elevate code readability, bolstering ongoing and future development initiatives.
- Utilizing React and Next.JS for front-end development, creating dynamic and interactive UIs with a focus on rapid requirement implementation, quick load times, and greatly improved SEO.
- Styling applications with SCSS and Bootstrap to ensure dynamic, responsive, and visually appealing design across the platform on multiple devices.
- Implementing user accessibility enhancements following WCAG specifications, extending the service's usability to a broader audience.
- Actively engaging in continuous education, such as pursuing online courses and actively participating in team-wide professional development discussions, to consistently enhance and expand my skill set.

BCForward, Carmel, IN

May 2022-Aug 2022

Software Engineer Intern, TechPoint Xtern

- Collaborated remotely with a 7-person team to develop the Indiana Prosecutor Case Management System website.
- Engaged in professional development, civic engagement, and networking events as a TechPoint Xtern.
- Implemented quality-of-life features that effectively reduced customer service requests by hundreds, enhancing overall user and developer experiences.
- Utilized React/Node.js for frontend development, PHP for backend development, and MySQL databases for seamless integration.

Luddy School of Informatics, Computing, and Engineering, Bloomington, IN

Sept 2020-July 2023

Luddy Student Engagement, Community Outreach Intern

- Collaborated with a student-led committee to enhance student engagement and promote success throughout Luddy by organizing various events and opportunities for networking and involvement.
- Coordinated and managed events successfully with 200+ students and families in attendance.
- Led the student outreach division of the Luddy Student Engagement organization.
- Directed and managed Luddy Saturdays, a fun youth outreach program designed to introduce students to tech through block-based programming and encouragement from mentors.
- Engaged Luddy students in community service by recruiting them to volunteer in outreach events across Monroe County.
- Trained 15+ volunteers on lesson materials and educational tools to ensure excellent performance at our events.
- Served and impacted the lives of 70+ students and families from 1st to 7th grade within the Bloomington community.

EDUCATION

Indiana University, Bloomington, IN

August 2019-May 2023

Bachelor of Science in Computer Science, Minor in Game Design

GPA:3.77/4.00

- Specialization: Software Engineering
- Honors and Awards: Luddy Direct-Admit, Dean's List, Founders Scholar, HHSP Scholar, Hutton Honors Scholar
- Related Courses: Software Engineering, Mobile App Development, Design Patterns, Computer Structures, Operating Systems, Data Structures & Algorithms, Discrete Structures, Use & Usability in UI/UX, Game Development, Game Design, Game Art and Sound, Narrative Design

PROJECTS

GWD Resource Repository

May 2023-July 2023

- Created a public repository of resources to assist future Bloomington youth web design and development outreach programs.
- Designed numerous HTML/CSS code snippets to show different styling options.

- Provided instructions for utilizing repository resources and other web development resources to assist users.

Medflow

Feb 2023-Mar 2023

- Developed a functional prototype of a medicine and water dispenser for children and elderly, utilizing Arduino technology.
- Collaborated closely with the project manager in developing the codebase and implementing the electrical wiring.
- Constructed using ultrasonic sensors, 3D printed containers, a servo motor, a water pump, etc to ensure optimal performance.

PyBot

Feb 2023-Mar 2023

- Developed a Discord chatbot with features including OpenAI text and image generation, unit conversion, and more.
- Demonstrated generative text and image AIs to attendees the Indiana Pacers STEM Fest 2023 in Indianapolis.
- Utilized Python3 and the Discord.py API wrapper library for efficient development.

YouTube Kid Controller

Jan 2023-Feb 2023

- Developed a prototype of a desktop YouTube controller designed for children, utilizing Arduino technology.
- Collaborated with fellow designers and built prototype using LEGO, specifically crafting the controller's buttons and shape.
- Implemented codebase and assisted with recording material for the video demonstration.

Personal Website

Sept 2022-Ongoing

- Continuously developing a personal website to showcase my education, projects, and personal story.
- Implementing a responsive design and key sections such as a project portfolio board and college semester summaries.
- Utilizing React/Node.js for efficient page loading and component structure and TypeScript for improved code quality.

Cordiall.gg

Feb 2022-May 2022

- Designed a robust framework for a website dedicated to delivering comprehensive information on accessibility options available in specific videos, catering specifically to the requirements of disabled individuals and competitive gamers.
- Led a team of four students in the design of the Figma prototype, effectively coordinating efforts to ensure the timely achievement of the project's accessibility objectives and deadlines.
- Conducted in-depth interviews and rigorous usability tests to gain valuable insights into our target audience's needs, while also validating the efficacy of our design choices.

Brainstorm

Sept 2021-Dec 2021

Full Stack Web Developer, Project Manager

- Developed a highly interactive web-based learning management system (LMS) application with a strong emphasis on gamified learning to enhance student engagement in grades K-8.
- Collaborated with a 4-person student team, employing Agile software development methodology across five two-week sprints to ensure efficient project execution.
- Utilized React/Node.js for frontend development, Java Spring Boot for backend development, and PostgreSQL databases for seamless integration.

TECHNICAL SKILLS

Web Dev: Next.js, Node.js, React, TypeScript, JavaScript, HTML/CSS, SCSS, Bootstrap

Languages: Java, C, PHP, Python, C#, R

Database: SQL, PostgreSQL, MySQL, MongoDB

Tools: Git, GitHub, JIRA, Figma, VSCode

Tech Misc: Arduino, UNIX, Markdown
